

VS-30-(BFG), Bi-Folding Gate

The VS-30-(BFG) is an electro-hydraulic bi-folding gate designed for secure and efficient vehicle access control applications.

Its shallow-mounted foundation, requiring only 350 mm depth, allows installation in a wide range of environments while minimizing civil works requirements.

TECHNICAL SPECIFICATIONS

- Gate Width: 4.0 m to 8.0 m
- Gate Height: 2.4 m to 3.2 m
- Foundation Depth: 350 mm
- Operating Speed: 10~15 seconds (additional 3~5 seconds for locking pin)
- Control System: PLC-Based Control System
- Finish: Blasted and Coated to standard RAL
