

VS-30-(F)-SM

Shallow Mount

Traditional Crash Rated Bollards require sizeable and deep foundations. While these are appropriate for many situations, there are occasionally some underground services and structures which prevent the use of these deep foundation products.

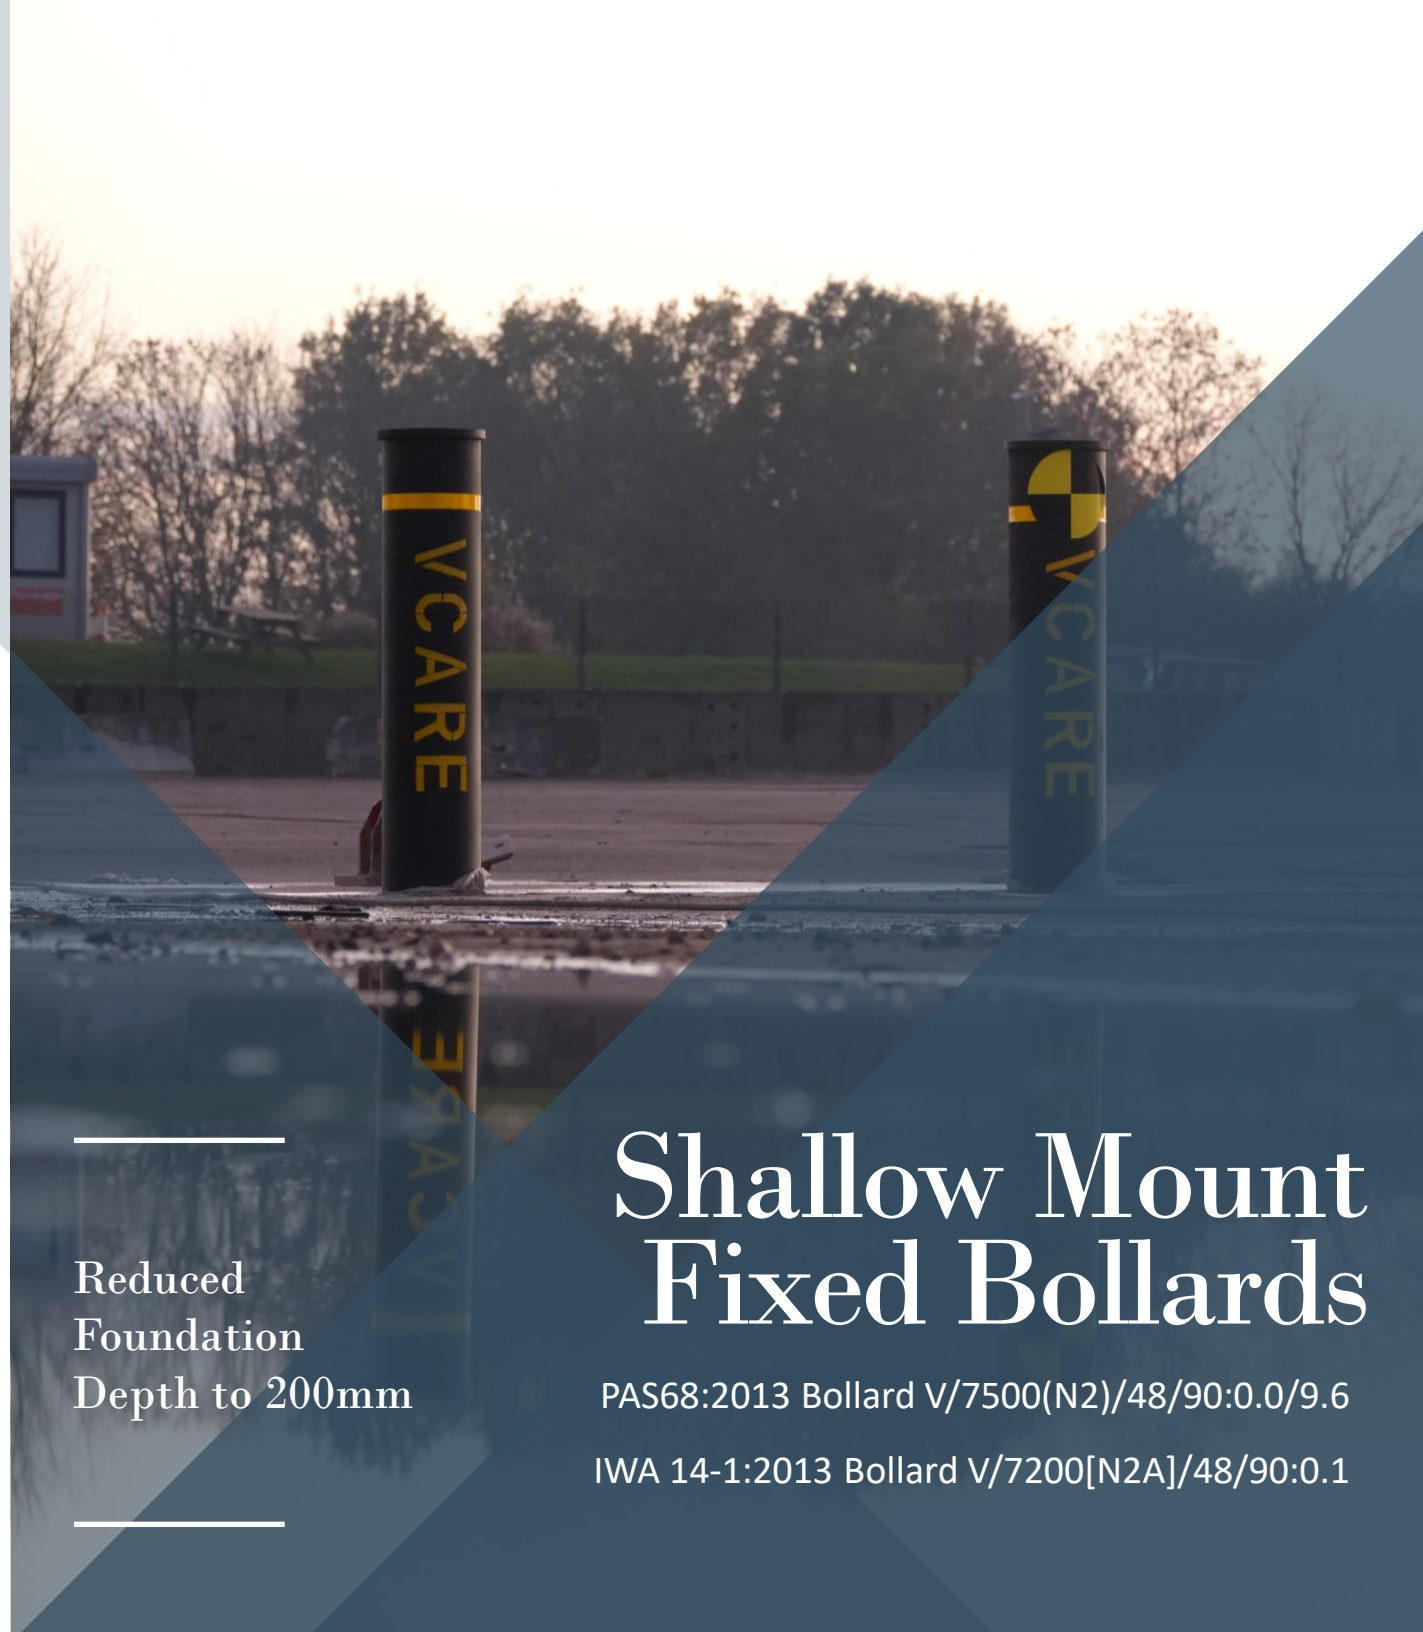

Our Shallow Mount design enables us to provide high security products which can be installed at a fraction of the depth underground that traditional products require.

- Bollard Diameter: 219 mm
- Height Above Ground: 1,040 mm
- Foundation Depth: 200 mm
- Options Available:
 - + Aesthetic Sleeve
 - + Removable Solution

Reduced
Foundation
Depth to 200mm
